

# Jake Lambert

Front End Developer

## Profile

1 year 1/2 commercial experience.

Always evolving my array of skills to stay relevant with new technologies. Deep logical understanding of the core programming languages and some popular frameworks.

## Experience

### Front End Engineer – Guider

Feb – May 22

- Developed and planned a new v3 platform for a business mentoring program.
- Implemented reusable components in React using the recent v5 Material UI library. State management w/ Redux.
- Tested code using Jest unit tests and Sonarcloud for an automated code review.
- Worked in an Agile environment w/ sprint planning and retrospectives every 2 weeks.

### Full Stack Dev – Charle Agency

Aug – Jan 21-22

- Building e-commerce websites specialising in React Shopify.
- Experience with the fundamental programming languages mixed with React, Liquid, & Tailwind.
- Future proof sites incorporating optimisation for speed, SEO, & responsive design for all devices.

### Front End Dev – VGD Ltd

Feb – Aug 21

- Worked with an array of languages & frameworks and learned the process for delivering the product with QA.
- Work shadowed senior developers with over 10 years experience
